CATALOGUE  
OF  
ARCHITECTURAL ORNAMENTS  
AND  
STATUARY,  
IN  
SHEET ZINC, BRASS OR COPPER,  
MANUFACTURED BY  
W. H. MULLINS,  
SALEM, COLUMBIANA CO., OHIO.

EIGHTH EDITION.

NUMBER 6, "E"

J. T. WAGNER, SALES AGENT, No. 108 Chambers St., New York City.

## INTRODUCTION.

THE perfection we have attained in the modeling and manufacture of Sheet Metal Ornaments enables me to present, and guarantee to Architects and the Trade at large, an almost endless variety of Stamped Metal Ornaments, superior both as to perfection of modeling and detail in manufacture to any heretofore placed on the market, and in offering this my Sixth Edition Ornament Catalogue, do so, confident that my endeavors to make the best and most artistic work will be appreciated by all interested in best work in Architectural Ornamentation.

### TO ARCHITECTS.

In my employ I have a corps of skilled Sculptors and Modelers, and at any time any Architect will send drawings of Special Ornamental Work, I will be pleased to have plaster models made and submit same with estimate of cost of work for their approval, and guarantee finished work to be equal to, if not superior, to plaster models; no charge will be made for this work, unless it is satisfactory and accepted, and I most respectfully invite correspondence.

### TO CORNICE MANUFACTURERS.

Realizing the delays experienced by Cornice Manufacturers, and the fact that often they cannot get drawings of work until it is almost wanted, and therefore cannot always anticipate their wants for Sheet Metal Ornaments, has induced me to increase my facilities for manufacturing, placing me in a position to execute orders promptly for special work, and enable me to carry in stock a very large line of regular Catalogue Work, so as to be prepared to ship ordinary orders promptly on their receipt. My facilities for executing work promptly, will be realized, when I state that my plant is fully five times as large as that of any other Manufacturer of Architectural Ornaments in the United States, and fully double the capacity, of any other Manufacturer in the same line of work in the world. On all special work other than shown in Catalogue, I will be pleased to make estimates and quote prices, and will at all times guarantee prices as low as consistent with character of work wanted.

### CHEAP SHEET METAL ORNAMENTS.

To meet a class of competition which has recently arisen in the West, we have thought it best to show a line of work made to meet this demand, and will guarantee this line of Ornaments to be in every way superior to the work made by the parties referred to, and good first class work in every respect, but made in light relief, and of light gauges of sheet metal. When in the want of best work I do not advise the use of this line of Ornaments, but when cheap work to meet competition is wanted, they are just the thing. Send in your orders and be convinced.

### COPPER WORK.

The use of Ornamental Copper Work has increased very rapidly during the past few years, and to meet this demand I have recently gone to heavy expense in fitting up for the manufacture of Ornaments from this metal, and I am now prepared to make Copper Ornaments, perfect in workmanship, and beautifully cleaned and finished, to correspond in color and finish to cold rolled and planished copper work, on which this class of ornamental work is generally used. The cost of copper entering into these ornaments is so great, and the demand for Copper Ornaments as yet comparatively so limited, I have not felt justified in carrying them in stock, and therefore have not listed them in my Catalogue, but will be pleased to quote prices at any time my customers may desire. Until such a time as the demand for Copper Ornaments justifies and they can be manufactured in quantities, and carried in stock, it will be almost impossible to name any price for them, based on present list prices for Zinc Ornaments, that would be of any service to the Cornice Manufacturer in preparing his estimates of cost of Copper Ornaments. The reason for this is, that at present, the price of Copper Ornaments must vary according to the quantity wanted, owing to the fact that the labor of preparing and setting dies, forces, &c., is the same for a small, as for a large number of any given design of ornaments, and if charged to making a small number, must necessarily make them cost much more in proportion than if this same labor of setting dies, &c., was distributed among a large number, hence I always advise, and would prefer if possible, for customers to write or telegraph for estimates on Copper Work before quoting prices on it, or before ordering.

### EASTERN AGENCY

For the accommodation and convenience of my Eastern Customers and Export Trade, I have established a branch Office and Ware-room at No. 108 Chambers St., New York City, Mr. J. T. Wagner, Sales Agent, where a full line of samples and a large stock of regular Catalogue Work will be found. Architects and those interested in Architectural Ornaments are invited to call and examine samples.

In ordering by telegraph, always use the telegraphic cipher which will be found in connection with the index in the back of this book. In ordering always state whether you wish goods sent by Freight or Express; failure to do this, will cause delay in shipment. The prices quoted in this Catalogue are based on work made in sheet zinc. Prices quoted for work made in copper or brass on application. Will always be prepared to furnish designs made by other Manufacturers at same prices for same character of work. All prices in this Catalogue subject to a discount to the Trade which will be arranged by correspondence. Should Catalogue not contain designs approximating closely enough with what you require, send drawings or sketch showing what you want, for it is possible that among our large number of special dies, we may have something that will answer your purpose; and will save you the cost of modeling.

8½ in. projection; 3½ in. deep; width of Face, 3½ in.  
 3277—in parts, each \$3.00 3278—complete, each \$3.50

I have a great many designs of Brackets and Modillions not shown in this Catalogue. Should you not find what you want among the designs shown, send sketch stating sizes of what you want, and I can probably approximate closely enough from designs on hand. Prices quoted on other sizes on application. These Brackets and Modillions make a beautiful finish in copper. Always state with each order whether you want goods sent by freight or express.

## Sheet Metal Statuary.

---

**I**N this department great advancement has been made, and a grade of highest ART WORK attained, which a few years ago would have been regarded as impossible to accomplish in this material, and I now guarantee artistic work in sheet metal statuary, which, while it can be sold at a very much lower price, will compare most favorably as to modeling and execution with the finest cast metal work. The principal advantages claimed for sheet metal statuary are its lightness, cheapness, great durability, and its peculiar fitness and adaptability for ornamentation in architecture. The statue of Hermann, cut of which is shown on page 55 of this catalogue, was made by me for a monument at New Ulm, Minnesota, and is the largest and most imposing sheet metal statue ever made in this country, and has attracted great attention here and abroad. This statue is made of sheet copper ranging in gauge from 20 ounces to 48 ounces, all joints being countersunk and riveted, and the copper work stiffened and supported with a light frame work of steel Ts and angles, all securely interlaced and riveted, making at the same time an extremely light and strong construction, the former demonstrated by the fact that this statue, while 32 feet in height, weighs only about three thousand pounds. The Hermann statue is the second largest statue ever erected in the United States, the Bartholdi Liberty (which was made in France) alone being larger. This statue will demonstrate to Architects and others the class of work I am prepared to furnish. Parties ordering statues from me, where special designs are to be made, may be confident of getting work perfect as to modeling and execution, and of having their wishes carried out in detail; and I will be pleased at any time to model and submit small plaster sketch or model of statues for the criticism and approval of parties ordering, no charge for so doing to be made unless design is satisfactory.

The prices for statuary named in this catalogue, as also for all ornaments priced in it, are based on making them of sheet zinc, which is the cheapest material that can be used, but where more durable and artistic work is wanted we would strongly recommend the use of sheet bronze or copper, and will be pleased, on application, to price work made in either of these materials.

*Hermann*—No. 3356—32 Feet high to top of sword point.

## Stamped Zinc Ceiling Center Pieces.

Stamped sheet metal work, as used for Ceiling Center Pieces, possesses great advantage over the heavier and more expensive stucco and cast work, which will at once recommend it to those in ornamentation of this character.

The principal advantage claimed for Sheet Metal Center Pieces is the extremely low price at which they can be sold, beauty of finish, durability, lightness, the ease with which they can be put up, and the fact that they may be shipped without danger of breakage.

These Centers are all finished before leaving the factory, and painted a lustreless white to correspond with plaster finish of ceiling and are priced in this way. They can, however, be painted and ornamented to suit the taste of purchasers, and to correspond with style and decoration of room where used. These Centers are simply screwed to the ceiling after plastering is put on, and can at any time be taken down, cleaned and replaced without damage to the ceiling or Center Piece.

The prices given are for Center Pieces finished a beautiful white ready to put up, and delivered carefully boxed or crated on cars at Salem. Necessary white headed screws together with a small vial of paint and hair pencil will be furnished with each shipment of Center Pieces, to be used in retouching should they become soiled in fastening up.

Correspondence solicited. Always state whether work is to be sent by Express or Freight.

36 1/2—45 in. High; 20 in. Diam. at Base, each \$18.00

IN STYLE AND FINISH THESE GOODS ARE WITHOUT EQUALS IN THE MARKET

## Spun and Machine Made Balls.

## Bracket &amp; Modillion Rolls.

## Spun Balusters.

I have added to the assortment of balls heretofore manufactured, a line of copper, and leaded iron machine made half balls, which will be found superior to anything in the market, and at prices very much lower than it is possible to make spun balls. These machine made balls will be found much superior to zinc balls for use in architectural work, for the reason that they are much stronger and stiffer than spun balls.

Machine made balls not made larger than 6" in diameter.

## NET PRICES.

## New Designs of Cresting and Cresting Blocks.

The Crestings and Cresting Blocks shown herewith are entirely new and original in design, and are made of stamped crimped iron or zinc, being stamped in two plates, soldered or riveted together, shipped either separately as Cresting Blocks ready to be applied to the ordinary 2" ridge roll, or made up as Crestings as shown in design No. 3726. These designs of Crestings and Cresting is are intended to meet the requirements of the Contractor, Builder and Roofer for a cheap ornamental ridge cresting, and will be found to be the cheapest and most artistic cresting that has ever been offered to the trade. In using these cresting blocks it is not necessary that they should be soldered to the ridge roll, but simply slipped over the end of the roll before placing it in position on the roof, and after spacing them as required, nail through the lower flange to the ridge pole, using a small slender wire nail for this purpose. In using them in this way the nail used in fastening the cresting blocks also answers the purpose of holding the ridge roll in position on the roof, and does not necessarily add any additional nail holes other than would be used in applying ridging in the ordinary way.

The finials or terminals shown on page 101 are used in connection with the cresting and cresting blocks as terminals on the end of cresting.

# Wrought and Tubular Iron Awning Brackets or Supports Covered with Corrugated Iron.

Special designs of Artistic Wrought Iron Work on application. Write for prices. Correspondence solicited.

No. 7053. Design showing front view of balcony with Corrugated Iron covering.

No. 7053. End view of balcony.

No. 7094. Wrought Iron Awning Support.

No. 7095. Wrought Iron Awning Support.

No. 7096. Wrought Iron Awning Support.

No. 7095. Wrought Iron Awning Support.

These Awnings furnish an extremely durable, ornamental and effective protection against the sun and storm and add greatly to the artistic effect of building. The above Awnings can be furnished roofed with glass if desired.

## Wrought and Tubular Iron Awning Supports,

TO BE COVERED WITH CORRUGATED IRON.

Special designs of Awnings to suit any particular requirement will be furnished on application.  
Correspondence solicited.

No. 7084. Wrought Iron Awning Support.

These Awnings are self-supporting,  
are cheap, artistic and durable.  
Write for prices.

No. 7086. Wrought Iron Awning Support.

Frame work for supporting Awnings made of heavy tubing.  
Brackets of Ornamental Wrought Iron.

No. 7097. Wrought Iron Awning Support.

No. 7099. Wrought Iron Awning Support.

No. 7085. Wrought Iron Awning Support.

In writing for prices send sketch, giving plan of building, showing location of columns and pilasters, and describe fully what you want.

## Wrought Iron Balcony Brackets and Railings.

Our facilities for making all kinds of Light Architectural Wrought Iron Work are unsurpassed, and I solicit correspondence with architects and builders and will at all times be pleased to estimate on any special designs they may send me. I employ a corps of skilled designers and draughtsmen and will furnish original designs and drawings to harmonize with any particular style of building. Write and make known your wants and we will give you the benefit of our experience.

## Stamped Steel, Galvanized Iron and Copper Rock-Faced Siding.

No. 7107. Stamped Black Steel Rock-Faced Siding. Stamped in plates 2 feet wide by 10 feet long. Per lineal foot .17

Price of any of these designs made in Galvanized Iron, Zinc, Copper or Aluminum, will be quoted on application. Made in Stamped Steel it can be used as a substitute for Corrugated Iron, is fully as durable, and is new, novel and ornamental.

Price quoted is for work made in Black Steel, painted both sides. If other material is wanted write for prices.

No. 7106. Stamped Steel Siding. Stamped in plates 2 feet wide by 10 feet long. Per lineal foot, .18

No. 7108. Stamped Black Steel Rock-Faced Siding. Stamped in plates 2 feet wide by 10 feet long. Per lineal foot, .18

Stamped Steel Rock-Faced Siding is superior to Corrugated Iron, and when used for siding buildings is much more ornamental. Very easy to put on.

# Stamped Steel Rock-Faced Siding.

No. 7110. Rock-Faced Brick. Stamped in plates 2 feet wide by 10 feet long. Per lineal foot, .13

Price, \$13.50

No. 966. 17 x 29 inches.  
Price, \$12.00

Other sizes priced on application.

### Sheet Steel Ceilings.

My facilities for furnishing Artistic Sheet Metal Ceilings are probably unequalled. Combining with my new and artistic designs of Embossed Steel Ceilings thousands of Stamped Metal Ornaments suitable for ceiling ornamentation, gives me a variety to select from possessed by no other manufacturer.

I furnish all kinds of Steel Ceilings, from the cheap corrugated iron ceiling to the deep, bold and magnificent galvanized iron ceilings, enriched with heavy stamped zinc ornaments, suitable for large court rooms, halls, etc.

If intending purchasers will send me the floor plan of the rooms for which they wish ceilings, showing exact location of elevator, stair openings, or other offsets or projections, marked in figured measurements, I will send them a special design to suit their requirements. In sending diagram for estimate always note the exact number of center pieces required, locate as near as possible the position of gas or electric light drops, and always give the distance from top of window casings to the ceiling, so that we will know the extreme depth of cornice to figure on furnishing.

Designs furnished to suit special requirements. Write and get my designs and prices before ordering elsewhere.

The above cut is an enlarged representation of Diaper "E," which forms the body or field of ceilings, as shown in designs Nos. 7116, 7133 and 7134, and is stamped in steel sheets 24 x 84 inches exclusive of laps.

Price per sheet .09

No. 3012. Galvanized Iron Ceiling. Ornamented with Heavy Zinc Ornaments.

No. 3021. Galvanized Iron Ceiling. Ornamented with Heavy Zinc Ornaments.

## Galvanized Iron Ceilings.

Galvanized Iron Ceilings, designs of which are here shown, cannot be made in competition with several styles of Stamped Black Steel and Iron Ceilings now on the market and are not suitable for small rooms or stores, but are intended for use in large rooms, such as Court Rooms, Theatres, Public Halls and Churches. They are cheaper, lighter and much more durable than stucco ceilings and have the decided advantage over the latter of being practically

*Fire Proof.*

Estimates furnished on application.

## Kinnear's Patent Lock-Rib Roofing:

Kinnear's Patent Roofing, of which I am the exclusive manufacturer, is to take the place and entirely supersede the old style standing seam roof, in that it is highly ornamental, cheaply and easily laid, and makes an absolutely storm and water tight roof, and is recommended for use on any roof the pitch of which is steep enough for slate, standing seam tin, iron or shingle roof.

The roof as now made will be furnished in tin, black and galvanized iron, copper and pure aluminum.

As a copper roof it is absolutely the only roof that has ever been produced in which perfect expansion and contraction are provided for. The peculiar shape of the spring lock slide mouldings, the strengthening of same by the ornamental bands, the perfection of the slip joint at the lower edge of the sheet, the ingenious arrangement of the upper end of the sheet to provide against capillary attraction, together with the highly artistic appearance of the roof, will at once recommend it to the Architect and practical Roofer.

Another and very great advantage is that it can be sold at a price that will enable the Roofer to furnish it laid complete, on the roof at a lower cost and greater profit to himself than he could supply a roof of an equal quality of material made in the old way.

Correspondence with Architects and Roofers invited.

Price list and full particulars on application.

Drawings and estimates, furnished for consideration. Greenhouses, Curved Skylights, made of either Galvanized Iron or Copper, with Windows for Iron Cores, and Light Structural Iron Supports. Our Skylights are guaranteed to be of the best material and workmanship, and to be absolutely true and water tight. All construction being provided for and possibility of breakage of glass reduced to a minimum, an expansion or contraction of metal frame is allowed for and guarded against. We recommend leading all glass in a good quality of putty, although small lights may be glazed without.

Price \$720.00.

No. 7124 Stamped Rock-face Front.

Galvanized Iron only.

24 feet wide.

This Front is made of Stamped Rock-faced Galvanized Iron, ornamented with best and heaviest stamped zinc work, and especially designed as a Bank, Office or Store Building. Prices in this catalogue do not include glass, woodwork, hardware, cast or wrought iron work. Prices for any change from catalogue sizes and designs quoted on application. Special prices for Columns and Sills.

Price, \$1,540.00

No. 364. Sheet Metal Front

Galvanized Iron Work only

45 feet wide.

This Front, with its projecting bay windows, which make the upper stories light, airy and cheerful, is a very appropriate design for Office, Residence or Hotel Building, with store rooms below. Size of front can be varied. Write for prices, giving size of your proposed building, and mention number of the design you prefer. All our Fronts are made of best quality Galvanized Iron, securely soldered and riveted in best manner known to the trade.

The sizes of any of the Fronts shown in catalogue can be varied to suit requirements. Special designs of Sheet Metal Fronts will be made if catalogue does not contain what you want. In writing for prices always send plan of your building and state height of stories, thickness of floors, etc. In fact, send full description of just what you want.

No. 7113. Stamped Rock Face Front.

Price, \$375 000.

Galvanized Iron Work only.

[Corrugated.]

For repairing and re-modelling old buildings nothing can equal Sheet Metal, as it is light, cheap and durable, and can be used where expense would not justify use of any other material. For repairing old brick or frame buildings it is not necessary to remove the old walls, as the Sheet Metal can be fastened to the face of same at a very trifling cost. We will be pleased to make estimates and designs for modernizing old buildings by the use of Sheet Metal Fronts.

No. 7111. Galvanized Iron Front.  
Galvanized Iron Work only.

39 feet wide.

Suitable for two storerooms below, residences or offices above.

Price, \$255.00.

[COPYRIGHT.]

Price, \$3,500.

This design is intended for Store Room on lower and Office or Residence on second floor.

The projecting bay windows throw a great amount of light into the upper story, making it particularly desirable for use mentioned.

Sizes given for designs are not arbitrary; they can be varied to suit your wants. Write, stating size of front you wish, and I will quote you price.

No. 305. Sheet Metal Front.

Galvanized Iron Work only.

30 feet wide.

The projecting bay windows throw a

great amount of light into the upper story, making it particularly desirable for use mentioned.

Sizes given for designs are not arbitrary; they can be varied to suit your wants. Write, stating size of front you wish, and I will

quote you price.

Price, \$450.00.

No. 361. Sheet Metal Front.

Galvanized Iron Work only.

22 feet wide.

Sheet Metal Fronts are particularly valuable for repairing or modernizing old brick or stone buildings, as the Galvanized Iron Work can be put up on face of old building, making an entirely new exterior but leaving old walls intact. Send me photograph or drawing of your old building, with figured measurements, and I will send you special designs, with price, for a new Sheet Metal Front. Prices include only Galvanized Iron Work and do not include first story sills or columns.

## Cornice.

Cornice No. 7008. Height 68 inches, projection 26 inches.

Price \$8.00 per foot, complete, in sections, including wrought iron lookouts. Mitres, \$3.00 each.

The above design should be made in copper to obtain the best results. The rich dark bronze color of the copper after a short exposure to the weather shows off the stamped ornamental work to the best advantage. Prices for copper cornice quoted on application.

{COPYRIGHT }

Cornice No. 7004 Height 45 inches, projection 23 inches.  
Price \$5.00 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$2.75 each

Cornice No. 7008. Height 45 inches, projection 18 inches.  
Price \$2.75 per foot, complete, in sections, including wrought iron lookouts. Mitres, \$2.50 each.

All prices for Cornice work in catalogue are based on using best quality of Crimped Galvanized Iron, with heavy bold stamped Zinc Ornaments. Price for same designs made in cold rolled copper will be quoted on application.

[COPYRIGHT.]

## Cornice

Sizes of Cornice on this page can be varied Prices for different sizes on application

Cornice No. 7009 Height 50 inches, projection 20 inches

Price, \$4 00 per foot, complete, in large sections, including wrought iron lookout Mitres. 82 50 each

Cornice No. 7007 Height 30 inches, projection 11 inches

Price, \$3 25 per foot, complete, in large sections, including wrought iron lookouts Mitres, \$1 25 each

The above Cornices made in copper are very beautiful, and while they will cost slightly more in this material than if made in Galvanized Iron, as priced above, they are sufficiently artistic and attractive to warrant expenditure. In copper these Cornices will last for ages. Prices of above in copper on application. Copper Cornices should not be painted, as when exposed to the weather for a short time it assumes a magnificent dark bronze color.—[COPYRIGHT.]

## Cornice.

Cornice No. 7002 Height 40 inches, projection 18 inches.  
 Price, \$3.50 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$2.00 each

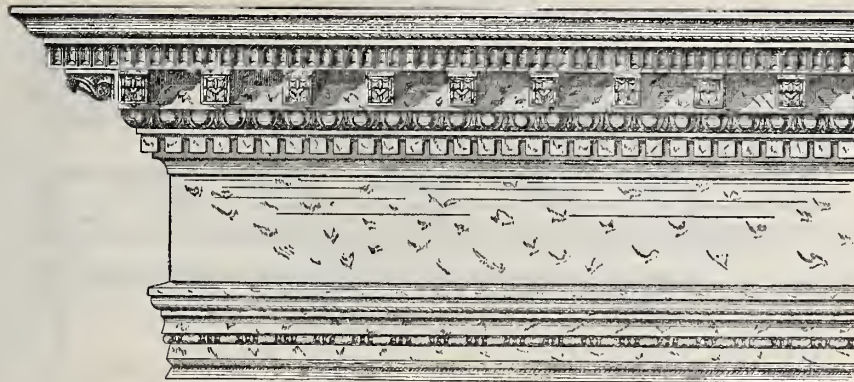

[CUT RIGHT]

Cornice No. 7003 Height 30 inches, projection 26 inches.  
 Price, \$3.50 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$3.00 each.

The above Cornices made in copper are very beautiful and effective, and I will gladly make estimate for reproducing either of the above in copper on receipt of plan of building showing amount required.

Copper Cornice assumes a rich antique bronze color, which greatly lightens the artistic effect of building possible, as it will last for ages. Use copper wherever

Cornice.

Cornice No. 7011. Height 59 inches, projection 23 inches.  
Price, \$4.50 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$2.75 each.

Cornice No. 7005. Height 31 inches, projection 11 inches.  
Price, \$2.50 per foot, complete, in sections, including wrought iron lookouts. Mitres, \$1.75 each.

Prices of above Cornices made in copper on application. Copper Cornices are almost indestructible. The dark bronze color they assume when exposed to the weather a short time greatly heightens the artistic effect of the building.

Notice.—Any variation in size of Cornices shown in this catalogue will necessitate an increase in cost. Prices for any desired change quoted on application.

## Cornice.

All Cornice work shown in this catalogue is priced in Galvanized Iron, but price for any design made in copper will be quoted on application. Remember, all our work is made with improved steam power machinery and in best manner known to the trade. Only best quality work and material furnished.
